DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: there are no prior arts teaching or suggesting of a tire pressure sensor comprising:

a switch contained within a valve system of a pneumatic tire, the switch including a transmitter;

a manually operated plunger is depressed in a specified sequence to learn and to identify the location of said tire pressure sensor, wherein the switch is structurally integrated into the valve system; and wherein when the switch is actuated the switch will transmit tire pressure information to a receiver.

The prior arts disclose the learning of tire location information through a hand held magnet instead of by utilizing a manually activated plunger.

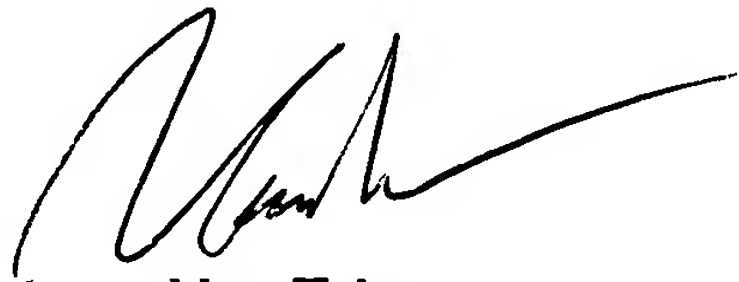

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
